SHREYAS RASAM

Mumbai, India • +91 8108877577 • Shreyas.rasam@outlook.com • linkedin.com/in/shreyas-rasam-258213242 • github.com/SSR139

PROFESSIONAL SUMMARY

Results-driven AWS Cloud & Security Engineer with 3+ years of enterprise experience in cloud infrastructure design, site reliability, and automated governance across mission-critical environments. Proven expertise in multi-tier deployments using Terraform, Docker, and CI/CD pipelines, enforcing Zero Trust architectures, and implementing least-privilege IAM and AWS KMS encryption. Demonstrated background in FinOps cost optimization, Agile team coordination, and sustaining 99.9% uptime SLA compliance while cutting MTTR by 35%.

CORE TECHNICAL & MANAGERIAL COMPETENCIES

- **Cloud & Infrastructure:** AWS (VPC, EC2, ECS, Fargate, S3, RDS, ELB, Route 53, CloudFront), Linux Administration, High Availability (HA), Disaster Recovery (DR)
- **IaC & Automation:** Terraform, AWS CloudFormation, Python (Boto3), Bash Shell Scripting, Git, GitHub
- **Cloud Security & Governance:** AWS IAM (RBAC / Least Privilege), AWS KMS, AWS WAF, AWS Shield, CloudTrail, CIS Benchmarks, SOC 2 / ISO 27001 Alignment
- **Containers & CI/CD:** Docker, Kubernetes (EKS / Core Primitives), Jenkins, AWS CodePipeline, CodeBuild, CodeDeploy
- **Observability & Governance:** Amazon CloudWatch, CloudWatch Logs, Root Cause Analysis (RCA), SLA Governance, Jira, Agile/Scrum, Sprint Planning, FinOps

PROFESSIONAL EXPERIENCE

Technical Support Engineer | Orbit TechSol *Nov 2025 – Present | Mumbai, India*

- Oversee 24/7 cloud operations across 60+ AWS EC2 and containerized workloads, sustaining a 99.9% uptime SLA across development, staging, and production environments.
- Lead cross-functional incident triage and root cause analysis (RCA) in Jira/Scrum workflows, reducing recurring runtime outages by 30% and cutting MTTR by 35%.
- Harden cloud infrastructure security posture by auditing AWS IAM role boundaries, fine-tuning Security Group rules, and enforcing CIS Benchmark controls.
- Automate routine operational health checks and log rotation using Python (Boto3) and Bash scripts, eliminating 6+ manual engineering hours weekly.
- Collaborate with DevOps engineers to streamline CI/CD deployment gates and rollback strategies, reducing release-related deployment incidents by 25%.
- Manage onboarding, technical mentoring, and standard operating procedure (SOP) documentation for a team of 4 junior engineers, shortening time-to-productivity by 40%.

Senior Associate | SBILife Insurance LTD *Jun 2023 – Nov 2025 | Mumbai, India*

- Managed application operations and ticket governance for mission-critical insurance web platforms serving 500K+ policyholders, resolving 80+ monthly enterprise tickets within 98%+ SLA targets.
- Partnered with application developers and systems teams in an Agile environment to identify backend performance bottlenecks, accelerating incident resolution cycles by 35%.
- Audited user access controls and role-based permissions (RBAC) in adherence to regulatory data privacy and BFSI security compliance standards.
- Led bi-weekly operational review meetings to analyze incident patterns, driving continuous process improvements that eliminated recurring transaction failures.
- Executed disaster recovery readiness drills, scheduled data backups, and security patch rollouts, ensuring zero business interruption during critical operational windows.

TECHNICAL & CLOUD SECURITY PROJECTS

Enterprise-Grade Scalable & Secure Web Architecture on AWS | *Terraform, VPC, ALB, WAF, KMS, CloudTrail, CloudWatch*

- Provisioned a multi-tier, fault-tolerant infrastructure using Terraform (IaC) featuring multi-AZ Amazon VPC, isolated public/private subnets, and NAT Gateways.
- Hosted containerized workloads on Amazon ECS with AWS Fargate, auto-scaling compute capacity dynamically behind an Application Load Balancer (ALB).
- Enforced enterprise security by integrating AWS WAF against OWASP Top 10 exploits, establishing AWS KMS customer-managed keys (CMK) for data encryption at rest, and routing traffic via Route 53 and CloudFront.
- Centralized security auditing with AWS CloudTrail and CloudWatch, implementing automated alarms that notify operational teams of unauthorized API calls.
- Conducted FinOps cost optimization via AWS Cost Explorer and resource rightsizing, cutting projected infrastructure expenses by 22%.

Automated Multi-Stage CI/CD Pipeline | *Terraform, Jenkins, Docker, GitHub, Amazon EC2*

- Engineered an automated continuous delivery pipeline utilizing Jenkins, GitHub webhooks, and Docker to compile, test, and package microservices upon pull-request merge.
- Automated target EC2 cluster provisioning via Terraform modules, configuring restricted IAM instance profiles, hardened SSH keys, and isolated security groups.
- Integrated container image vulnerability scanning into the pipeline build phase, ensuring zero high-severity CVEs enter the registry before production deployment.

Containerized Microservices Pipeline with ECS & Fargate | *Docker, Amazon ECR, AWS Fargate, CloudWatch Logs*

- Containerized microservice APIs using multi-stage Docker builds to reduce image footprint by 45%, storing signed images in Amazon Elastic Container Registry (ECR).
- Configured centralized logging and metrics collection via CloudWatch Logs and Insights, reducing mean time to detect (MTTD) operational bottlenecks by 40%.

EDUCATION

Bachelor of Engineering in Electronics & Telecommunication (EXTC) — Vidyalankar Institute of Technology, Mumbai *2023 | CGPA: 8.87 / 10*

Diploma in Electronics Engineering — Government Polytechnic Mumbai *2020 | Score: 86.00%*

CERTIFICATIONS & ACCREDITATIONS

- **AWS Certified Solutions Architect – Associate (Amazon Web Services)**
- **Oracle Certified Cloud Architect – Associate (Oracle Cloud Infrastructure)**
